

Sonoma County Annual Report

2017
Community Priorities

As we reflect on the past year and look forward to the next, the vital role the County plays in improving the lives of the people and communities we serve has become all the more clear. We are living and working with a pre-and-post fire frame of reference – just like every county resident, business, government agency, and nonprofit.

This new lens will continue to impact the way we do business, the way we define achievements, and the way we bring renewed focus to our strategic priorities. In this Annual Report, we are using this new frame of reference to share our accomplishments by strategic priority and before and after a night our community will never forget: October 8th.

Despite the challenges we have faced, Sonoma County continues to build a better government that strives to be responsive and accountable, supports healthy and sustainable watersheds, offers affordable housing in an inclusive community, provides access to services and opportunities for individuals to move toward self-sufficiency, and continues to improve our transportation network.

Every aspect of your county government is committed to the recovery and rebuilding of our community. The path ahead is going to be challenging, but we will work through it together. We will be here today, next week, next year and beyond to do whatever it takes to rebuild our beautiful county and make our community stronger than it has ever been.

Together, we are strong, we are resilient, we are Sonoma County.
