Section 2: Disability Documentation Checklist

In order to qualify for Chronic Homeless Status, a person must have a disability that is expected to be of long, continuing, or of indefinite duration, and substantially impedes the individual's ability to live independently, and could be improved by the provision of more suitable housing conditions. Qualifying disabilities for HUD projects include the following chronic conditions: Mental Health Disorder, Substance Use Disorder, Co-occurring Mental Health and Substance Use Disorder, Physical Disability, and Developmental Disability. The documentation for disability must be third party and include:

Select which of the following is being used to verify disability status at this time and attach all supporting documentation-

- Written verification from a professional licensed by the state to diagnose and treat the disability and certification that the disability is expected to be of a long-continuing or of indefinite duration and substantially impedes the individual's ability to live independently;
- Written verification from the Social Security Administration; or
- The receipt of a disability check.

In the absence of the above noted methods of verification, an observation of a qualifying disability by an agency identified staff person may be used to temporarily verify disability. However, this must be confirmed by one of the above methods within 45 days. This option should be used sparingly. For HUD funded projects, if verification by one of the above mentioned type is not secured within the 45 day period, the funding for that bed would be impacted and may not be paid at all for the duration that the applicant is in the housing.
